

RayUV_Viewbox.faq

Q: Do I need to purchase a lamp in addition to the View Box?

A: Yes, you may use the LS-7 (Model 7), LS-88 (Model 88), or the R5 (Raytector R-5).
Note: The R5 requires the use of the VB-7 with the VB Adapter.

Q: Which lamps work with this?

A: The models listed above are the only models that will work with the View Box.

Q: Will any lights from other manufacturers' work with this?

A: No other manufacturers' lamps will work with the Raytech View Box.

Q: What type of applications would this be used for?

A: The View Box is a convenient examination tool. Preferred in classrooms and laboratories.
